

8100

8100

The 8100 is our lowest cost ATM designed for merchants with low-traffic, tended locations who are overserved by bigger, more expensive ATMs.

The low-cost ATM for low-traffic locations.

Our most basic model, the 8100, will take up the least amount of floor space, yet provide all the customer convenience associated with having an ATM at your location. This smaller design increases shipping options, which can mean a reduction in shipping costs.

The 8100 includes the basic essentials for an ATM, making it easier for merchants to manage, all at the most cost-competitive price.

The 8100 features Triton's own TDM-50 dispensing mechanism, which requires the least amount of steps to handle. With the TDM-50, top loading and a single cassette which slides in and out, requires less time for the merchant to load.

Because it's from Triton, you can count on the 8100 delivering Triton's unparalleled reliability and quality. The 8100 incorporates state-of-the-art electronics and a key-lock mechanism, most suitable for tended locations.

The 8100 features VISA Encrypting PIN Pad (VEPP) and Triple DES, the new standard for PIN encryption as standard features. Furthermore, the 8100 meets all ADA requirements.

Triton's cost-competitive 8100 is designed with low-cost and low-traffic locations in mind.
