Document Updates

February 27, 2014 Original

Ensure the most up-to-date software is installed on the unit BEFORE proceeding.

INTRODUCTION

PURPOSE

This guide covers the steps for installing a new Security Module (SM). The new module adds additional security to the mainboard to dispenser communications path. These procedures include a list of all tools and hardware necessary for the replacement as well as the steps involved.

SCOPE

These procedures apply to all VERIFIED TRITON TRAINED service personnel involved in the process of maintaining or converting Triton ATMs.

APPLICATION

This conversion kit applies to the Traverse model ATM. If you have any questions contact Triton Technical Support.

NOTES

SOFTWARE DEPENDENCY

It is unlikely but possible that your unit **will not** recognize the new Security Module with your current software. Please visit the Triton web site (<http://www.Triton.com>) for the latest version, or contact Triton Technical Support.

UNIT CONFIGURATIONS

Due to production, rehab, update, or repair differences, your unit **may vary** in hardware, or, cable color, length, and routing, as compared to the examples given. These instructions are **representative** of the upgrade for each type of unit. Your units **appearance may vary**.

TOOLS

The use of magnetic implements may be helpful in the removal and replacement of some hardware.

KITS

Due to the versatility of the kit, there **will** be parts that are **not** used in your particular unit.

ADDITIONAL NOTES

IT MAY BE BENEFICIAL TO ASSEMBLE THE SECURITY MODULE, CABLES AND BRACKET INTO A COMPLETED ASSEMBLY BEFORE GOING TO YOUR PARTICULAR SITE.
