TECHNICAL BULLETIN: 14-08

DATE: March 28, 2014

SUBJECT: SSL Certificates for Triton Connect Users

AVAILABILITY: All Authorized Triton Distributors and Third Party Service Providers

This bulletin addresses:		Recommended Implementation is:	
	Hardware Service Issues		Now for all affected units
	New Kit/Parts Available		All affected units during next service visit
	Software Announcements		Optional
X	Technical Tips	X	No implementation required

DESCRIPTION:

Triton ATMs (RT/FT/RL/Traverse/ARGO) currently support SHA-1 digests for SSL communications. We have been made aware that some Certificate Authorities are now creating certificates that use SHA-2 digests, which are not yet supported by Triton ATMs.

When purchasing an SSL Certificate to be used with a Triton ATM, be sure to specify SHA-1 if there is an option. For some Certificate Authorities (i.e. GoDaddy), the certificate expiration date will need to be before January 1, 2017 to be compatible with SHA-1.

If you have questions regarding this Technical Bulletin, please contact Technical Support at 1-228-575-3100 or toll free in the U.S. / Canada 1-800-259-6672. Visit www.Triton.com for additional information.
