**LED SIGN BACKLIGHT UPGRADE KITS**

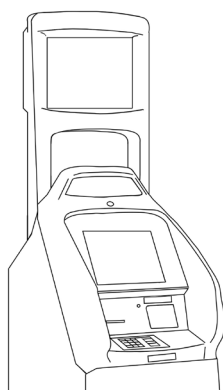

**TECHNICAL TIP: 17-10**

**DATE: AUGUST 17, 2017**

## TRITON TECHNICAL TIP – CHOOSING AN LED SIGN BACKLIGHT UPGRADE KIT

Triton offers a new, improved lighting solution to replace the LED sign lighting used in current products. Beginning immediately, all new and refurbished units will ship with the new, trapezoidal LED sign light. Field upgrade kits are available for purchase for 8100, 9100, 9700, ARGO, RL2, and RL5 models.

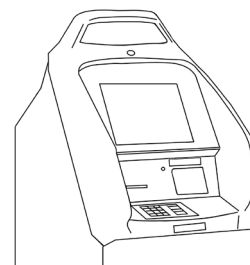

Careful attention should be paid to what type of topper is installed on a unit, the lighting inside the topper assembly, and the back panel on the topper. These items will determine which Triton LED Sign Backlight Upgrade Kit is needed. Examples are shown below.

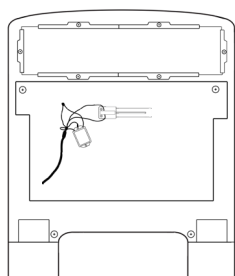

High Topper

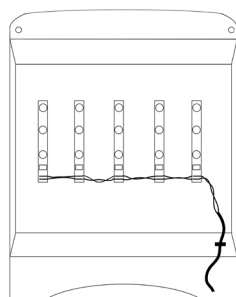

Mid Topper

Integrated Topper

Flourescent

LED Strips

Contoured Bracket

Flat Back Bracket
