OPTIONAL UPGRADE – RELEASE OF TRITON CONNECT 6.1

Triton Connect 6.1 replaces the previous Triton Connect 6.0 SP5, and adds new features and capabilities which now includes a dashboard that can be used to view various components. The dashboard is separated into three sections: Terminal Status, Call List, and Call Viewer. Right-clicking these components on the dashboard allows users to access additional functions for each section.

Parameters in previous versions of Triton Connect were stored in an Access database. In this release of Triton Connect, parameters are stored in SQL. Triton Connect 6.1 also includes support for licensing based on the number of terminals in Triton Connect.

In addition, the Triton Connect 6.1 software release will no longer require user account control (UAC) to be disabled, nor will users require administrative privileges. See release notes at www.tritonatm.com for a full description of features and download instructions.

****Note****

A new comloc will be required if upgrading from Triton Connect 5.x or earlier.
