TRITON SYSTEMS RELEASES A NEW WIZARD FOR SOFTWARE DOWNLOADS

Finding the correct up-to-date software for the Triton product line has not been a simple task...until now. Over the years the www.tritonatm.com software download page has become crowded and disorganized. This has been simplified by using a selection wizard.

With the new software wizard, software, firmware, or utilities can be filtered by product, platform, and country. Users may also enter the serial number into the designated box to populate software relevant to the unit.

The unit serial number is located inside the upper left portion of the ATM on a white label with a barcode. It is also located on the packing slip that shipped with the ATM.

To get software downloads, log into www.tritonatm.com. After clicking on the desired software and agreeing to the software user agreement, your software download will begin. If you do not have a username and password for the Triton website, contact webhelp@triton.com.

If you have questions regarding this Technical Bulletin, please contact Technical Support at 1-228-575-3100, option 4 or toll free in the U.S. / Canada 1-866-787-4866, option 4. Visit www.tritonatm.com for additional information. For all ATM parts, repair, and training needs, visit www.atmgurus.com.
