### **Triton Introduces New Dispenser Option**

Our software and hardware engineers have been hard at work to find new dispenser options for our retail models. We understand that the more flexible our product is the happier our customers will be. With that in mind, we are proud to announce that the Glory MMR-050 single cassette dispenser will be available for use in our ARGO 7.0, ARGO 12.0 and ARGO 15.0 lobby ATMs.

This versatile dispenser is replacing the Glory SDD 1700 which went end of production in February 2020. This high-performance, friction-feed mechanism offers front delivery of paper and polymer notes. The MMR-050 eliminates the cassette loading tray (from the SDD 1700) and the need to prime the cassette (also from the SDD 1700). MMR-050 cassettes come with a key lock and a latch. Additional technical specifications include:

<b>Glory MMR-050</b>	
Speed	5 notes/sec
Document size range	Length = 110–170mm Width = 60–82mm Thickness = 0.07–0.14mm
Capacity	2,000 banknotes with integrated reject area 50 note capacity
Max transaction size	50 notes
Weight (without notes)	13kg

Triton puts a lot of focus on security. "We are dealing with people's hard-earned money daily," says Terry Asher, executive vice president of engineering and operations. "We have installations around the world, so security is of paramount concern. As a result, the integration of the MMR-050 includes the same high level of security that we offer with our other dispenser options."

We will launch the MMR-050 in Q1 2022 initially as a single cassette model in the U.S. and Canada for the ARGO lobby models. The 2 and 4 cassette option will follow in 1H 2022 as will other markets. New pricing grids to include this option will go out soon. If you have questions, don't hesitate to get in touch with us at [sales@triton.com](mailto:sales@triton.com).
