VersaSafe®
VersaLink

POWERED BY TDL™

Ideal for cash intensive businesses, VersaSafe is a remarkably fast, secure and accurate smart safe. Retailers will spend less time counting cash, and have a much more secure automated cash trail. VersaSafe helps reduce internal theft by eliminating cash touch points and external theft by allowing retailers to quickly secure cash.

Using VersaLink allows for tracking transactions, viewing cash levels remotely and the overall safe health in real-time. It sends notifications via e-mail or text message and makes managing your accounts simple with a wide range of custom reports. With VersaLink and an established banking institution you can set up provisional credit which will reduce the float time of cash deposits.

Thank you for supporting American workers!

Triton®

SINCE 1979
THE ORIGINAL RETAIL **ATM**
