

CONFIGURE PRINTER

NOTE: The options available may vary depending on ATM model, installed dispenser, and/or optional peripherals. Changing the font size and spacing can affect the quality of text receipts.

1. Navigate to Management Functions > Diagnostics > Printer > Configure Printer.
2. Press Font Size to change the printed font characters to either 16-dot or 24-dot font. Applies to management Reports and text receipts only.
3. Press Line Spacing (0-255 dots) to set the spacing between lines on the receipt or coupon. Applies to management reports and text receipts only.
4. Press Char Spacing (0-127 dots) to set the spacing between characters on the receipt or coupon. Applies to management reports and text receipts only.
5. Press Receipt Format to choose either a text or graphics format for the receipt.
6. Press Minimum Receipt Length to set the minimum length for a customer receipt. The default is 1150 dots (approximately 5 5/8" or 144 mm). Not available when using printer presenter.
7. Press Print Density to set the printer density to either 100% or 130%. Density of 130% improves the quality of the receipt but can shorten the printer head life.
8. Press Reset All to initialize and perform an operational test of the printer.

ISSUES

The number of graphics that can be used is limited by memory and storage space on the system. Triton recommends maximum number of full screen graphics as noted below:

- RL1600, RL2000, RL5000, FT5000, RT2000 and ARGO 15: 10
- Traverse: 6
- ARGO 7, 12 X2: 5
- ARGO 7, 12 X3 or X4: 10

XScale is very limited on space, so we typically recommend compressed jpg (50kb to 100kb each).

The X2 system has much more space so it's not as much of an issue but smaller graphic sizes are recommended.

First note, to determine if the ATM can display a specific image you can go to Ad Graphics > Add New, highlight the desired graphic and select Preview. If the image doesn't display it may be the wrong size or format.

GRAPHIC SIZES

Graphics should not exceed 100kb in memory

Model	Size	Screens	Pixel Size	Format	Color
ARGO 7.0	7" Display	Full Screen Ad	796 x 476	jpg, gif, bmp, png	
		Welcome Ad	446 x 294	jpg, gif, bmp, png
